

# User Acceptance Testing (UAT) Template

Date	17 February 2026
Team ID	LTVIP2026TMIDS80676
Project Name	FreelanceFinder: Discovering Opportunities, Unlocking Potential
Maximum Marks	

## Project Overview:

**Project Name:** FreelanceFinder: Discovering Opportunities, Unlocking Potential

**Project Description:** FreelanceFinder is a MERN-stack based freelancing platform that connects clients and freelancers through a centralized web application. The system allows users to register, post projects, submit proposals, upload work, and manage project communication through secure role-based dashboards.

**Project Version:** v1.0

**Testing Period:** 05 February 2026 to 24 February 2026

## Testing Scope:

### Client Features

- Create and manage projects
- View freelancer submissions
- Select freelancers
- View Submitted Project
- Real time Chat
- Review

### User Features

- User registration and login
- JWT-based authentication
- Role-based dashboards
- Project browsing and searching
- Freelancer application system
- Real time chat

### Admin Features

- Monitor users and platform data

**Testing Environment:**

URL/Location: <http://localhost:3000>

Credentials: Test user login details

**Test Cases:**

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Login	Enter valid credentials → Click Login	Dashboard opens	Dashboard loaded successfully	Pass
TC-002	Post Project	Fill project form → Submit	Project created	Project visible in list	Pass
TC-003	Submit Proposal	Freelancer submits proposal	Client sees proposal	Proposal visible in client dashboard	Pass
TC-004	Upload Work	Upload submission file	File saved	File displayed in submission page	Pass

**Bug Tracking:**

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	No critical bugs found during testing	—	Low	Closed	System working as expected

**Sign-off:**
